My Gebi · ገቢ

Customers, bookings and ብዶር

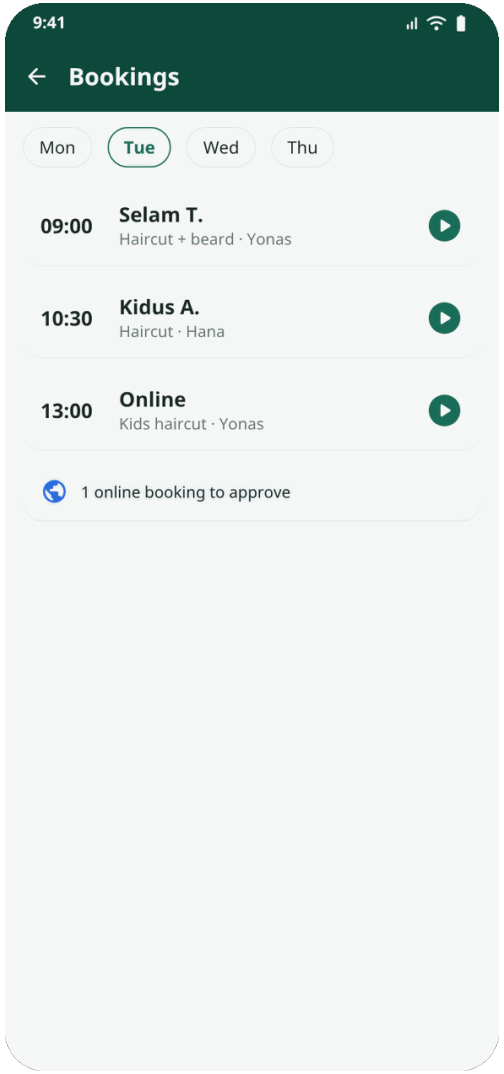

Regulars are your best business. Know them.

The customer book

- More **Customers** **+**: name and phone.
- Pick the customer when saving a sale: visits and spending are counted.
- Telebirr and CBE payers are **added by themselves** with the name from the payment.
- **Regulars** and **Haven't come back** (30 days or more): call or SMS them in one tap.

Bookings

- More **Bookings** the day **+**: customer, worker (or anyone), services, time.
- My Gebi warns if the worker is busy or off that day.
- **Remind** sends the customer an SMS. On arrival: the booking **Start sale**.

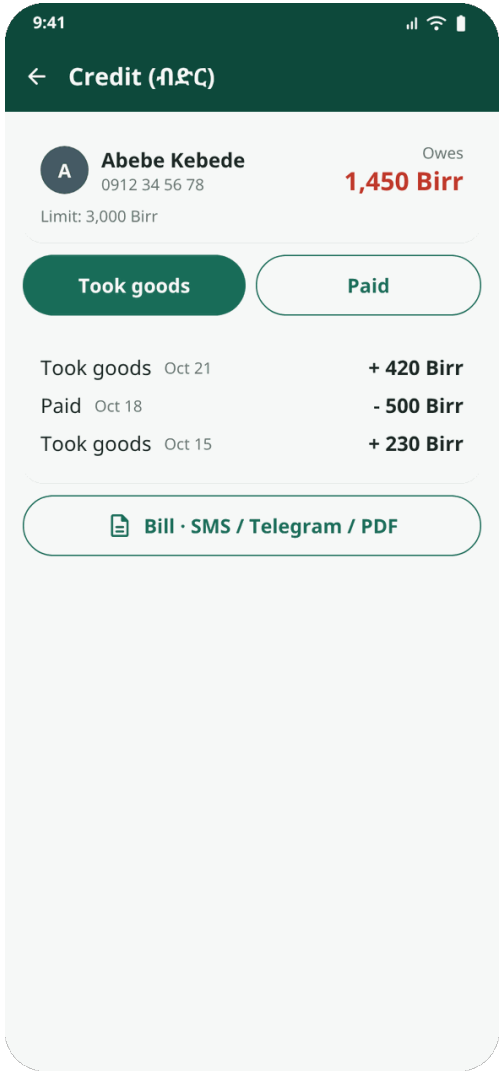

Online booking

- More **Online booking**: your own link and QR. Print the poster for the mirror or the door.
- Customers choose service, person, day and a **really free** time, on the web or in the Gebi Telegram bot.
- Confirm by itself, or approve each one. Telegram customers get a reminder 2 hours before.

Example: Bole Barbers put the booking QR on the mirror. In the first month 86 bookings came online, most for Saturday mornings, so the owner added a fifth barber on Saturdays.

ብድር: credit for customers

- More **ብድር** the customer (or add them with their phone).
- **Took goods:** pick the items, or type an amount. It adds to what they owe.
- **Paid:** the amount and how (cash, Telebirr, CBE). A payment in the Inbox can be marked as a credit payment directly.
- End of month: the customer **Bill** SMS, Telegram or PDF.

Keep credit safe

Set a **limit** per customer: the cashier is stopped above it.

Send bills on the same day every month.

Look at who owes the most every week.
